

Revo 700 line, powered by Innova

Drivers:

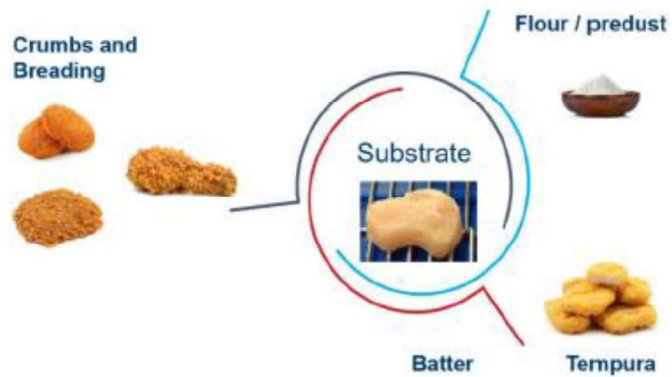

- Small footprint
- 16% higher throughput compared to 600mm
- Higher throughput by increased line speed up to 25m/min
- Ease of operation
- Optimized processing (INNOVA)

Coating Technology

Coating system

Wet coating

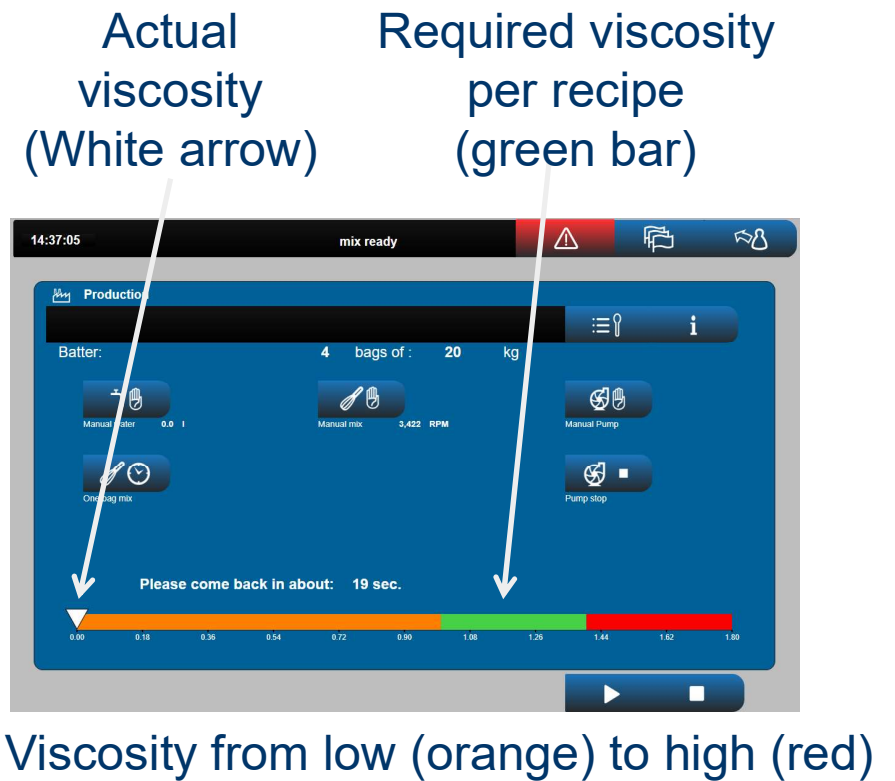

Dry coating

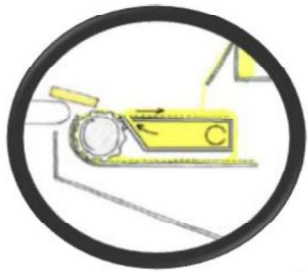

Active Mixer

- Active process control
 - Recipe management
 - Time for making next batch
 - Automatic water dosing
 - Feedback on batter viscosity compared to recipe setting

Active Batter Applicator

Translating

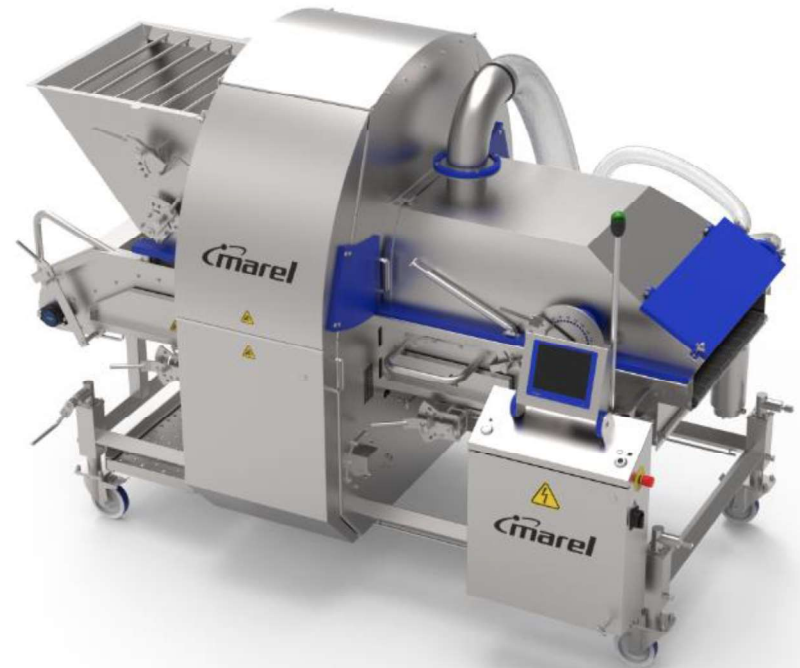

RevoCrumb

Crumb management

Translating

RevoBreder

- Dual mode machine
 - Home style coating
 - Homogenous coating

Translating

Summary: Marel new 700 coating portfolio

- New benchmark in coating
- High process robustness
- Optimum product coverage
 - Active bottom bed in Active Batter Applicator
 - Active Mixer viscosity feedback
 - Crumb management in RevoCrumb
 - High impact home style RevoBreader
 - Constant product appearance
- Quick change over
- Innova prepared
- Also available in 600 execution
